Sequence 2, Application US/09141206

Patent NO. 6.18759:
GENERAL INFORMATION:
APPLICANT: Steed, Paul M.
APPLICANT: Lasala, Daniel J.
TITLE OF INVENTION: Amino Acid Sequence of Hum:
Patent No. 6187559
FILE REPERENCE: 4-30148/P1/CGC1954/R
CURRENT PILING DATE: 1998-08-27
BARLIER APPLICATION NUMBER: 60/057,802
BARLIER FILING DATE: 1997-08-28
NUMBER OF SEQ ID NOS: 8
SOFTWARE: PatentIn Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         EMGVVIESPKIAEQMER 467

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 5540, Application US/09543681A

Batent No. 6605709

GENERAL INFORMATION:

APPLICANT: GARY BEETON

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PROTEUS MIRABIL

TITLE OF INVENTION: DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: 2709.1002-001

CURRENT APPLICATION NUMBER: US/09/543,681A

CURRENT FILING DATE: 1999-04-05

PRIOR APPLICATION NUMBER: US 60/128,706

PRIOR PELING DATE: 1999-04-09

NUMBER OF SEQ ID NOS: 8344

Sequence 356, Application US/09881752A

Patent No. US20020115078A1

GENERAL INFORMATION:
APPLICANT: Kleanthous, Harold
APPLICANT: Miller, Charles
APPLICANT: Miller, Charles
APPLICANT: Ownen, Raymond P.
TITLE OF INVENTION: Identification of Polynucleotides
TITLE OF INVENTION: Encoding No. US20020115078A1e1 Helicobacter Polypeptides in the
TITLE OF INVENTION: Genome
FILE REFERENCE: 06132/041002
CURRENT APPLICATION NUMBER: US/09/881,752A
CURRENT FILING DATE: 2001-06-15
PRIOR APPLICATION NUMBER: US 08/813,457

PRIOR APPLICATION NUMBER: US 08/813,457
                                                                                                                                                                                                                                           165
                                                                                                                                                                                                                                                                                                                         222

Sequence 2, Application US/09848726
Patent No. US20020102667A1
GENERAL INFORMATION:
FALE SEPTICANT: NAMPOCHTRI, Madhavan
TITLE OF INVENTION: NO. US20020102667A1e1 Nucleotide Sequences Coding for the cls Ge
TITLE OF INVENTION: NO. US20020102667A1e1 Nucleotide Sequences Coding for the cls Ge
TITLE OF INVENTION: NO. US20020102667A1e1
TITLE OF INVENTION: NO. US20020102667A1e1
CURRENT APPLICATION NUMBER: US/09/848,726
CURRENT FILING DATE: 2001-05-04
NUMBER OF SEQ ID NOS: 4
SOFTWARE: PatentIn version 3.1
SEQ ID NO 2
LENGTH: 500
ILENGTH: 500
